

Installation guide for downloading Trimmomatic and installing it on your super computer.

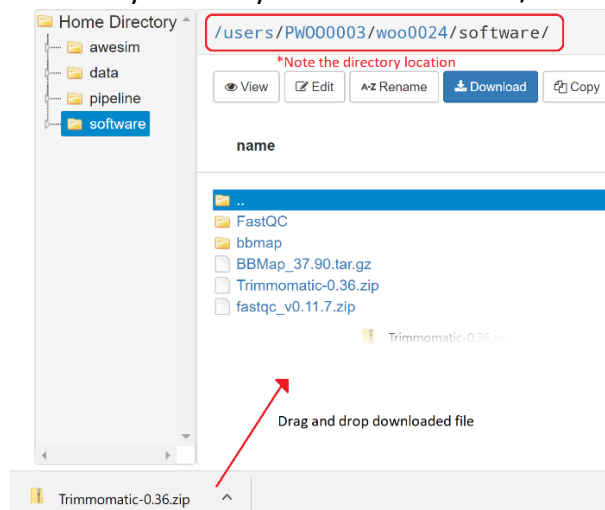

- 1) Start this by downloading the binary software package at the Trimmomatic website -- <http://www.usadellab.org/cms/?page=trimmomatic>

Downloading Trimmomatic

Version 0.36 [binary](#), [source](#) and [manual](#)

Click here to begin download

- 2) Then add the downloaded file to the software location in your super computing system. Notice my directory is called "woo0024/software/"

- 3) Once the zip file is on your super computing system you must extract the information from the compressed folder. Follow the commands in the screenshot below to unzip this folder.

```
bash-4.2$ pwd //Make sure you are in the software directory
/users/PW000003/woo0024/software
bash-4.2$ ls //Identify Trimmomatic zip file
bbmap BBMap_37.90.tar.gz FastQC fastqc_v0.11.7.zip Trimmomatic-0.36.zip
bash-4.2$ unzip Trimmomatic-0.36.zip //Command to unzip compressed folder
